PROFESSIONAL SUMMARY

Full-Stack Engineer with 3 years of experience building scalable, secure, and high-performance web applications using Node.js, NestJS, React, and PostgreSQL. Strong expertise in backend architecture, REST API development, microservices, and cloud deployment on Azure, with hands-on experience building responsive frontend interfaces. Proven ability to design multi-tenant systems, optimize database performance, and deliver end-to-end production-ready solutions.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Express, REST APIs, GraphQL, JWT, OAuth, Azure AD B2C

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS

Databases: PostgreSQL (SQL), MongoDB (NoSQL), Redis, TypeORM

Cloud & DevOps: Azure, Docker, Kubernetes, CI/CD

AI & GenAI: Generative AI, LLM integration, RAG-based architectures

Tools: Git, GitHub, Swagger, Jest

EXPERIENCE

Celebal Technologies

Feb 2023 – Present

Full-Stack Engineer

Jaipur, IN

- Developed end-to-end full-stack applications using **Node.js**, **NestJS**, **React**, **PostgreSQL (SQL)**, and **MongoDB (NoSQL)** for enterprise use cases.
- Designed and implemented secure **REST APIs** in **NestJS** with layered architecture, DTO validation, centralized error handling, and authentication using **JWT**, **OAuth**, and **Azure AD B2C**.
- Built responsive frontend features using **React** with efficient state management and backend API integration.
- Implemented **multi-tenant architecture** with tenant-level data isolation and role-based access control for multiple enterprise clients.
- Optimized database queries and indexing strategies, improving API response times and overall system performance.

PROJECTS

Greenprint AI | *NestJS, React, PostgreSQL, Azure, Docker, Kubernetes*

Mar 2024 – Present

- Developed end-to-end features across backend microservices and frontend modules for onboarding, subscriptions, reporting, and user management.
- Built a dedicated **notification microservice** to manage all email communications, scheduled jobs, and reminder workflows.
- Integrated **MyInfoBiz API** for verified entity data to support compliance and automated onboarding workflows.
- Implemented **subscription management** with plan upgrades, downgrades, and role-based access control.
- Designed **multi-tenant architecture** for secure, client-specific configurations and data isolation.
- Deployed applications on **Azure** using **Docker**, **Kubernetes**, and CI/CD pipelines.

Transpyle AI | *Node.js, MSSQL, MongoDB, Azure*

Jul 2023 – Mar 2024

- Built a **Node.js** backend for AI-driven code conversion between **PySpark** and **DBSQL**, achieving approximately 75% accuracy.
- Integrated **LLaMA**, **Mixtral**, and **Databricks APIs** to support automated code migration workflows.
- Deployed the system across **Azure** and on-premise environments using CI/CD pipelines.

Moviesdesk (Personal) | *React, Node.js, MongoDB, Nginx*

Aug 2024 – Apr 2024

- Built a full-stack web application for discovering movies and TV shows using public third-party APIs.
- Developed backend services using **Node.js** and **MongoDB** with frontend integration in **React**.
- Optimized traffic handling and request routing using **Nginx** for improved performance.

EDUCATION

Arya College of Engineering & I.T

Bachelor of Technology, Information Technology

Jaipur, IN

July 2019 – May 2023

CERTIFICATIONS

- Azure Fundamental
- Azure Data Fundamental
- Javascript Basics to Advance
- Front-End Development
